

Air Purifier – Airgoclean 100 E

Fully automatic HEPA air cleaning with "Triple Protection" filter technology - including remote control

Equipped with 3 filters, including PREFILTER, carbon, and HEPA (95% efficiency).

The integrated pre-filter collects large dust particles to protect the HEPA filter which serves its purpose to remove bacteria, viruses and pollen, dust mite residue, and other allergens from the air.

The HEPA carbon filter is most effective against house dust, pet allergens, cigarette smoke, smog, and particles that carry smell and contaminants.

Additionally, this device comes with an ionization function. The released ions remove pollen, dust, viruses and bacteria from the air.

The three-stage fan allows uncomplicated, quick filter changes for easy maintenance and operation.

Air quality sensors continuously measure the room air and react to real-time results. The air and filter sensors allow fully automatic purification, removing suspended particles from the room in the shortest time possible.

Thanks to its compact dimensions, the device can be transported conveniently between rooms.

A few practical benefits	Technical data	
<ul style="list-style-type: none"> • Three-stage room air filter system with DACRON® pre-filter, carbon filter and HEPA filter • Effective HEPA filtration of pollutants and odours • IR remote control • Air quality display • Suitable for rooms of up to 21 m² / 52,5 m³ • Cleaning volume max. 180 m³/h • 3 blower stages • Improved air purification through ionizer • Compact and powerful with easy operation • Uncomplicated, fast filter change • Automatic operation • Filter indicator light • Lock function to protect the device settings • Timer function • Night mode (whisper quiet) • Low noise: max. 49 dB(A) • Low energy consumption • Allergy friendly <p>Effective against: Pollen and pet allergens Fine dust, house dust and dust mite residues Viruses, bacteria and mould spores Cigarette smoke and unpleasant odours</p>	Suitable for rooms: up to approx.	53 m ³ / 21 m ²
	Level 1 [m ³ /h]	70
	Level 2 [m ³ /h]	130
	Level 3 [m ³ /h]	180
	Integrated filters	Pre-filter HEPA (95% efficiency) Carbon filter
	Dimensions LxWxH	321 x 210 x 523 mm
	Weight	5 kg
	Integrated:	Air quality sensor Air quality display On/ off switch Child lock Timer function Dust sensor Ionization Infrared remote control Filter cleaning indicator Operating control lamp Automatic, turbo, and night operation
